

## Exercise 2 – TicTacToe Quality Scenarios

Learning objectives: Recap ISO 25010 quality attributes and learn practical application of quality scenarios

Remember, our project is:

### Browser-Based TicTacToe for 2 Players

A detailed description can be found in exercise 1. In addition, use the requirements document as a basis for the following tasks.

In your Git repository's `docs` directory: Create a file named `"quality.md"`. Write the results of the following tasks into this file. Commit and push it to GitLab once you are done.

### Part 1 – Quality Attributes

1. List and rank the 5 most important ISO 25010 quality attributes for your TicTacToe project.
2. For each quality attribute: Provide a short description, why this attribute is important for your TicTacToe project.
3. For each quality attribute: Name or create a use case for which this quality attribute is the most important. Describe how this specific quality attribute affects this specific use-case.
4. Name one quality attribute you think is specifically not so important. Provide a short description on why.

### Part 2 – Quality Scenarios

For each quality attribute: Create at least 2 quality scenarios.

**Make sure that your scenarios are actually measurable!**
