

Software Architecture and Design Patterns

Practical Exercises

Prof. Dr. Jóakim von Kistowski

TH Aschaffenburg
university of applied sciences

Organization

Lectures and Practical Exercises

Lectures

- Room: C2-225
- Totally interactive!

Practical Exercises

- Room: C2-225
- In small groups
- Bring your PC
- Pen and some paper helps
- Programming exercises and worksheets

	Monday	Tuesday	Wednesday	Thursday	Friday
08:00 - 09:30					Vorlesung Software Design
09:45 - 11:15					Übung Software Design
11:30 - 13:00			Lecture Software Design International		
	Lunch Break				
14:00 - 15:30			Exercises Software Design International		
15:45 - 17:15					
17:30 - 19:00					

On Public Holidays

SD Lectures are on Friday!

- Lots of public holidays on Friday

SDI Lectures are on Wednesday:

- Not so many public holidays on Wednesday
- Solution: Open Space and Live Coding Sessions on weeks with Friday off
- Open Spaces are announced ahead of time in Moodle

Moodle Course

German:

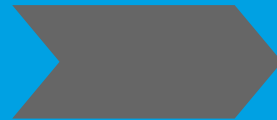

- SoSe26_SWA

International:

- SoSe26_SWA_SDI

- Enrollment Key: **SagaPattern_117**

Common Procedure

Recap of Previous Exercise

Practical or Written Exercise

Remainder as Take Home Assignment

Bonus Points!

- Bonus Points towards your exam when finishing the exercises
- Total of 6 points (ca. 0.3 grade steps)
 - All Points for:
 - Signing up to the bonus points by completing exercise 1 on time
 - Finishing all exercises successfully
 - Presenting at least once
 - Turning in your Git repository at the end
 - Presenting your final result

Git Repository

- You will be graded separately as if everything in your Git repository were written by you
- You may collaborate in groups up to 3 people
 - You will be allowed to have partially identical contents as the other 2 in your Git repo
 - Only documentation and MD-files, **not Code!** Everyone writes their own code!
- Personal Git repository
 - I will create it for you (you must ask for it **in person** during class!)
 - Must contain a README.md file at its root
 - Use the template in the Moodle class
 - Specify your collaborators
 - Specify your Matrikelnummer (Student-ID)
 - Make sure to place required documents at the path specified in the respective exercise sheet

Important Dates

- By exercise session 2 08.04. (SDI) / 10.04. (SD): Complete exercise 1
 - You must have signed up for your Git Repository **in person before April 08**
- Final Presentations are on: July 1st (SDI) / July 3rd (SD)

Warning!

- Be careful with who you pick as your team mates!
- You will share your architectural decision
 - This means, you are all bound by them!
 - Semi-made-up example:
 - Teammate A: *"Let's decide to use C# with Blazr. I know it well, it's great!"*
 - Teammate B & C: *"We have no experience with that sort of thing, so let's go with your decision..."*
 - Result: **Teammate B & C** were unable to implement the tasks and **did not get their bonus points.**

Final Presentation and AI

- Everything in these exercise sessions is about understanding software architecture
- You can use AI to help write documents and code
- Ensure that you fully understand them and that the generated documents / code align with your vision
- **Your understanding and thought process is tested in the final presentation**
- My assumption for your final presentation:
You generated everything and have no idea about why things are the way they are and how they work.
- Your task in the final presentation:
You must prove that you 100% understand everything as if you had written everything yourself. All decisions must be your own!

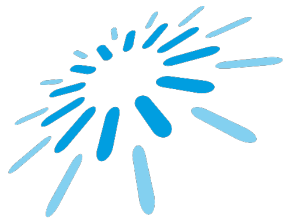

Exercise

To the exercise sheet!

Until next time!
